

# Marshmallow Chariot Instructions

Supplies needed:

Regular marshmallows  
Animal crackers  
Lifesavers  
Gummi bears  
Toothpicks  
Thread  
Scissors  
Water

Take a marshmallow and insert two toothpicks with just enough space between them to place an animal cracker between them. Take a short piece of thread and tie the animal cracker to the toothpicks to keep it from falling. Next take two lifesavers, preferably the same color and carefully dip one side into water and stick them to the side of the marshmallow. Dip the bottom of a gummi bear into the water and place on top of the marshmallow. Set aside to dry.

Try not to move until the water has had time to dry to ensure that the lifesaver wheels and the gummi bear will stick properly.
